

TRANSPORT AND INSTALLATION OF CNIV MODULE ONTO ERHA FPSO

General

Project	ERHA CNIV Module
Location	ERHA field, offshore Nigeria
Water Depth	1200 m
Client / Operator	Mobil Producing Nigeria
Execution	Q2-2018

Technical data

Quantity / Size / Weight	• CNIV Tank Module / 18 x 8 x 8 m / 102 t
--------------------------	---

Equipment Resources

Installation Vessel HLCV Jumbo Javelin

Key Equipment

- 700 t WLL Fly-Jib
- Various deck tuggers

Scope of Work

The scope of work comprised the transport and installation of a 100 t Calcium Nitrate Injection Vessel (CNIV) module on the ERHA FPSO offshore Nigeria for Mobil Producing Nigeria (MPN).

Project Highlight

Jumbo's 700 t fly-jib allowed for a robust lifting methodology with the HLCV positioned on DP and parallel to the FPSO. The integrated T&I of the module, with load-out directly from the fabricator quay, also eliminated the need for tugs and barges.
